📍 Linguistics Department, Harvard University

I am a Linguistics PhD student at Harvard University. I received my BA in Linguistics and Hebrew Language and MA in Linguistics from Tel Aviv University, where I was also a teaching and a research assistant. My research interests are in theoretical and experimental syntax, and the syntax-morphology and syntax-semantics interfaces. I am particularly interested in coordination structures, agreement, case and Semitic morphology. My current research focuses on the syntax and the semantics of coordination structures.

EDUCATION

2023-present	**PhD, Linguistics**, Harvard University
2021-2023	**M.A., Linguistics (Summa cum laude)**, Tel Aviv University
	Thesis title : Subject to change : Agreement Patterns with Unaccusatives
	Advisor : Prof. Tal Siloni
